

*“With LLumin, if an auditor asks you what your critical assets are specific to Food Safety, it’s a click of the mouse really, and you can bring them up instantly.”*

Sr. Reliability Engineer  
Mataura Valley Milk

## ASSET & INFRASTRUCTURE MANAGEMENT

What if you could eliminate downtime, mitigate risk, ensure compliance, make decisions based on real-time data, and optimize maintenance logistics.

Imagine being able to automate and streamline the tracking of all your valued assets—your infrastructure, machinery, and equipment.

**LLUMIN CMMS+ DOES IT FOR YOU.** Quite simply, CMMS+ helps you know everything about your critical assets and how to optimize their performance.

-  Their location
-  Value
-  Type and characteristics
-  Status and condition
-  Potential risks
-  Contributions to your success
-  Maintenance costs

No matter what industry you are in, LLumin CMMS+ can help you successfully manage your assets. LLumin CMMS+ is currently at work inside companies and facilities around the globe, in every market segment. So now these organizations can visualize their assets, especially those most critical to their operations, with a single click. They know where the assets are, what status they are in, and what actions need to be taken to optimize performance.

By now you’re probably saying, “But my business has unique asset and infrastructure classifications.” We at LLumin say, “No sweat.” LLumin CMMS+ is configured just for you.
