

Storable Customization

Combine the power of specialized storage management apps like storEDGE and SiteLink with Acumatica. With the Storable integration, you can gain a 360° view of your entire business. Easily map chart of accounts between storEDGE or SiteLink and Acumatica with full control of when and how the data hand-off is done between the facility management software and ERP application.

- **Eliminate Manual, Duplicate Data Entry**
- **Sync Transaction Details or Summarize Journal Entries per Account per Facility for Multi-Facility Scenarios**
- **Gain Transparency with Real-Time Cross-Site Reporting**

Key business benefits

- Centralize access to all self-storage and accounting data.
- Streamline management functions by integrating workflows and automating routine tasks.
- Enables users to manage the facility, customers, operations, and finances from one system.
- Integrates operational and accounting workflows.
- Generates real-time and historical operations and finance reports.
- Presents individual, team, and operational KPIs on dashboards.

Centralize Storage Operations and Financials on a Single ERP Solution

Self-storage providers can manage every aspect of their business, from facility management to accounting, sales, and marketing, on one intuitive system. They can leverage at-a-glance views of their KPIs with drill-down capabilities to inform everyday decisions that reduce costs and improve service.

Storage Management Made Simple

Self-storage providers can access their core business functions and data directly from Acumatica, anytime and anyplace. The Storable customization automatically transfers operational data from the Storable application into Acumatica accounting modules. The solution provides a 360-degree view of the entire business, enabling users to:

- Oversee GL, AP, AR, and requisitions across single or multi-facility scenarios.
- Align customer accounts with corresponding financial information for immediate access to account status, services, billing, payments, and more.
- Launch and measure marketing campaigns and analyze sales KPIs.

Streamline Processes and Boost Employee Engagement

Storable customization gives employees access to the real-time data and integrated workflows between Acumatica and Storable's SiteLink and storEDGE, so users can:

- Access a centralized system of record for the whole business.
- Integrate facility management and accounting workflows.
- Select summary GL data on reports for an overview of real-time finances.
- Drilldown in financial report detail to analyze general ledger information.
- Automatically synchronize data in Storable and Acumatica.

"I haven't been limited in anything I want to do with the platform, and that includes commercial limitations. Anything we wanted to do is available and reasonably priced; Acumatica is a great product that can be geared to different business levels."

—Warren Wilbraham, Head of Finance Planning and Excellence, SEACOM

> CUSTOMER STORIES

Financial Management

Provide Storable users with integrated financial management, including robust accounting, general ledger, AR/AP, purchasing, deferred revenue, and more.

Integrated Workflows

Automatically eliminate manual data entry and re-entry, and connects workflows between related applications, enabling users to quickly move between ordering/purchasing, accounts payable, and customer support.

Customer Case Management

Use integrated customer management to streamline customer support processes, maintain updated customer data, and link billing and payment information.

Sales and Marketing Management

Give Storable users CRM features for tracking sales, launching, and measuring marketing campaigns, and managing customer support activity.

One Source of Truth

Maintain one version of the customer, business, and financial information in the centralized database.

Automated Data Transfer

Automatically transfer operations data from Storable as Journal Transactions into Acumatica.

Real-time KPI Reporting

Generate real-time and historical reports on financial, business, and operational information and present user-defined KPIs on demand.
