

Tipalti Global Finance Automation for Acumatica

Maximize Efficiency and Accelerate Financial Close with Finance Automation

Automate

Automate manual financial tasks to control costs and drive efficiency.

De-Risk

Increase financial controls by automating reporting and compliance while reducing errors and fraud.

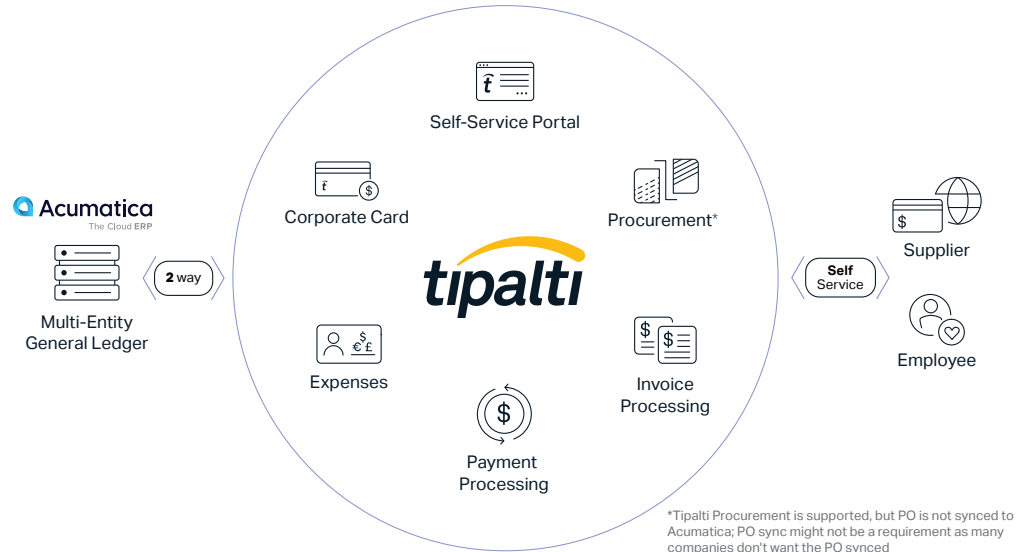

Inform

Gain real-time visibility into cash flow, spend, and streamlining payment reconciliation across entities.

Scale

Easily support growing headcount, multi-entity, suppliers, and global expansion all in one platform.

How Tipalti Integrates with Acumatica

Be More Efficient

Let your finance team focus on more strategic and impactful work by automating manual financial tasks with Tipalti's Acumatica integration. Tipalti streamlines supplier management with self-service registration and automatic validation of supplier data in real time. By leveraging 26,000 global banking rules to identify payment issues before they happen, Tipalti can reduce payment error rates by 66 percent. AI Smart Scan with two-way and three-way PO matching cuts down on overspending, while automated routing helps accelerate approvals.

Reconcile Payments in Real-Time

Streamline payment reconciliation and give finance teams real-time visibility into cash flow and spend. Accelerate reconciliation with all payment methods across multiple subsidiaries, global business units, and entities combined in a single report automatically synced in real-time with your Acumatica instance.

Gain Control and Visibility over Your Spend

Tipalti's powerful yet straightforward procurement solution standardizes and streamlines purchase requests and approvals. Employees can easily submit all spend-related requests with an intuitive, consumer-grade user interface and guided forms—ensuring all critical information is collected upfront. Tipalti allows companies to define policies and rules to auto-route purchase requests to the required approver.

Strengthen Compliance and Control

Stay updated on the latest regulations with Tipalti's world-class financial management and tax compliance controls. Mitigate tax penalty risks with KPMG-prescribed digitized tax form collection and validation with TIN matching. Signatory rights, role-based controls, robust workflow approvals, and built-in audit logs ensure you have the best internal and external controls.

Future-Proof Your Business Growth

As your business grows and handles more invoices, payments, global suppliers, and audit controls, Tipalti helps future-proof for scale. Our expertise in finance automation means we help you navigate complicated banking and tax laws, international payment regulations, and more without needing to add headcount. From managing multiple payment methods across 196 countries in 120 currencies to instituting global enterprise-grade financial controls, Tipalti handles it all in one system.

Streamline Expense Management and Reimbursement

Manage all employee spend in a single solution to increase financial control and visibility while reducing risk. Tipalti removes delays and headaches associated with employee expenses. Intuitive mobile and desktop employee interfaces make expense tracking, submission, and global reimbursement quick and easy.
