### SUMMARY

Fashion, apparel, and footwear businesses face constant change. Styles frequently change with seasonal stock change-over. Today's fashion world demands flexibility with omnichannel purchasing, returns, and exchanges.

Fashion and apparel retailers,etailers, and distributors require specialized software to track inventory by size, style, color, and other attributes.

Connections with multiple online marketplaces, commerce storefronts, brick-and-mortar retail outlets, or pop-up stores with point of sale are essential for growing sales with seamless connections to backoffice ERP applications for order fulfillment, shipping, financial analysis, and reporting.

Companies using legacy ERP or entry-level accounting applications and digitally native retailers looking to expand into pop-up locations struggle to manage omnichannel experiences while synchronizing systems with manual data exports and imports. As a result, information is delayed and inaccurate resulting in late fulfillment, canceled orders, and unhappy customers. Conversely, modern ERP applications couple front-end commerce with back-end ERP functionality for a holistic, bi-directional system to manage every part of the business for a better customer experience and faster order fulfillment.

This Industry Digest provides an overview of the fashion, footwear, and apparel industry from a retail and wholesale distribution perspective with insights into the industry's future, critical features to consider when evaluating a new ERP application, and a list of resources for additional information.

## INDUSTRY Overview

The fashion, footwear, and apparel industry faces a myriad of challenges with disruptive supply chains, evolving commerce storefront technologies, and new compliance mandates such as chain of custody (COC) for sustainability and ethical product management. These changes impact the entire fashion industry forcing wholesale distributors and retail merchants to adopt modern ERP applications and innovative technologies to drive growth in an uncertain, and globally competitive market.

The fashion industry was expected to decline nine percent from 2019 to 2020 due to the “retail apocalypse” caused by the global coronavirus pandemic. However, the market is projected to recover and grow by 11 percent through 2023.<sup>1</sup> The pandemic put many fashion companies out of business and disrupted the supply chain with significant increases in costs and longer sourcing lead times. A 2021 USFIA study<sup>2</sup> points out that 97% of respondents anticipate sourcing cost increases, citing shipping and logistics as a primary concern.

Consumer demand is driving fast fashion, athleisure, subscription services, and luxury apparel category sales. Fashion businesses are scrambling for new ways to leverage social media and online influencers to reach younger buyers. In addition, augmented and virtual reality plus wearable technologies are on the verge of changing everything with virtual changing rooms and smart-fit technologies. The industry is also experiencing smarter online commerce and in-store point of sale technologies that offer more profound personalized experiences and recommendations based on big data and analytics.

Retail fashion businesses are identified by SIC Code 56, 5944, and parts of 5999 or NAICS Codes 448 and 451130. Fashion wholesale distributors are classified by SIC Code 5131-5139 and parts of SIC Code 5084-5087 and 5199 or NAICS Codes 4243 and 423940. An industry breakdown for US companies by employee size is provided below.<sup>3</sup>

INDUSTRY SEGMENT	1-20	21-50	51-100	101-250	251-500	501+	TOTAL

## ACUMATICA Benefits

Fashion, apparel, and footwear retailers and distributors prosper with Acumatica Cloud ERP. Manage omnichannel orders through back-office ERP applications connected with B2B and B2C eCommerce storefronts and point of sale applications for in-store sales. Manage inventory and item data inside Acumatica with bidirectional connectivity with commerce and retail systems for order management, returns, and exchanges.

### ACUMATICA FOR THE FASHION INDUSTRY

Acumatica's robust inventory management application supports matrix items to create and manage apparel and footwear product families based on item attributes. eCommerce, point of sale (POS), and field service applications extend Acumatica for businesses that sell online (B2B, B2C, and D2C) or provide on-site services. Leverage automation, workflows, and document management to connect data and processes throughout the distribution business for improved service, retention, and growth. With Acumatica, fashion and apparel executives can:

- **Boost sales** with flexible pricing, promotions, up-sell and cross-sell suggestions, and integrated CRM for marketing and sales automation.
- **Simplify inventory** management with lot and serial tracking, native warehouse management, and configurable unit of measure conversions.
- **Optimize stocking levels** with robust inventory replenishment to avoid rush orders and stock-out situations with increased inventory turns and lower carrying costs.
- **Delight customers** with inventory stock reservations, faster order processing, and streamlined fulfillment.

Acumatica provides ease of use and an adaptable platform facilitating rapid integrations to connect modern technologies, including cloud computing, big data and analytics, and specialized automation systems for streamlined processes and meaningful insights across a company's operations. Acumatica delivers an unparalleled experience for users and customers alike. It is built on a scalable and future-proof cloud ERP platform with open architecture backed by the industry's best value-added reseller (VAR) network. Acumatica Cloud ERP provides the best business and industry management solution for transforming your business to thrive in the new digital economy.

*"Acumatica has been behind our success, and their support team has been integral in making sure that we've been as successful as possible. I would definitely recommend Acumatica to someone looking for a new ERP solution. Acumatica would be a great asset to anyone trying to expand its eCommerce platform."*

– THOMAS FINNEY, IT DIRECTOR, SHOEBACCA

Acumatica Cloud ERP is a comprehensive business management solution that was born in the cloud and built for more connected, collaborative ways of working. Designed explicitly to enable small and mid-market companies to thrive in today's digital economy, Acumatica's flexible solution, customer-friendly business practices, and industry-specific functionality help growing businesses adapt to fast-moving markets and take control of their future.
